 (11) Outseam _____
 (12) Rise _____
 Preferred Rise
 Male Short Regular Long
 Female Petite Regular Tall
 Shoe Size _____ Width _____

Comments: _____

HOW TO MEASURE

- Cap Measurement** — measure 3/4" above ear where your hat will be worn. Pull the tape tight to measure within 1/8".
- Neck** — measure around the base of the neck.
- Shoulder Pt. to Pt.** — measure across the shoulder bone to bone.
- Over-shoulder measurement** — with the arms down, place the tape around the fullest part of the shoulders, arms, and chest.
- Chest (male)** — measure circumference horizontally high underarm over blades.
- Bust (female)** — measure circumference horizontally across the bust point (apex) and over the shoulder blades.
- Sleeve Length** — measure from nape of neck over the shoulder to the wrist bone, to desired length (1/2" inch increments).
- Waist Length (Center Back)** — measure vertically from center back neck (largest cervical vertebrae) to the waist at center back.
- Abdomen Measurement** — measure around girth, at the widest point of the belly.
- Waist** — measure around waist, where you normally wear your pants. Measure over shirt, but not over slacks or belt.
- Hip/Seat** — measure at the fullest part of the hips. Make sure tape is comfortable and not too tight (7-9" below natural waist).
- Outseam** — measure from the top of waistband along outside seam line to desired length. Take this measurement with shoes on.
- Rise** — should be taken with person sitting on chair and measured from bottom of waistband to seat on chair. This determines the rise.
